

- Maximize miles
- Maximize uptime
- Maximize performance

Engineering Expertise

HXL7® Hendrickson's Extended-Life 7-year system™ combines Hendrickson's engineering and manufacturing expertise with high-performance wheel-end components to create a wheel-end system that is 100 percent field serviceable and delivers reliability and performance mile after mile. Built by our reputation for world-class research and design, the HXL7 boasts an industry exclusive seven-year limited warranty*.

Installation Expertise

Installed by factory-trained technicians, HXL7 features a precision-machined spindle, a premium Federal-Mogul seal, high-performance synthetic semi-fluid grease and our PRECISION320™ spindle nut system. The PRECISION320 nut allows for ultra-precise bearing adjustment. HXL7 bearings are set with a slight pre-load, only capable with Hendrickson's patented assembly technology, thus elevating bearing and seal performance beyond traditional levels.

Outstanding Performance

Designed to work in unison with Hendrickson's suspension systems, the HXL7 system helps enhance uptime and reduce maintenance. From suspension through wheel-end, Hendrickson provides ultimate system integration, which results in unmatched weight savings, durability and performance.

H HENDRICKSON
The World Rides On Us®

HXL7® Hendrickson Extended-Life 7-year System™ Features and benefits

Premium Federal Mogul Seal

- Long-life seal with Teflon lay down lip that is immune to temperature or chemical attacks, resists leaking and prevents contamination ingress

HP Parallel Spindle ONLY

- Parallel spindle promotes even lubrication of inner and outer bearings
- Approved for wide base tires using two-inch offset rims

Hendrickson's Patented Axle Filter and Axle Venting System

- Wheel-end vents through the axle, not the hub cap. The axle filter protects the wheel-end from internal contamination

PRECISION320™ Nut System

- Patented system allows for ultra-precise bearing adjustment. Bearings are set and controlled at a slight pre-load condition, thus elevating bearing and seal performance beyond traditional levels

Lube (Synthetic / Semi-fluid Grease)

- Formulated to perform in demanding conditions of high and low temperatures
- Excellent anti-wear and low friction performance
- Less prone to leaking compared to oil

Hubs

- Ductile iron, austempered ductile iron (ADI) and aluminum hubs with lube "fill ports" designed for accurate filling volumes

Non-Vented, Corrosion Resistant Aluminum Hub Cap

- High quality hub cap gasket with micro pore technology to help prevent wicking
- Prevents contaminant ingress in tough environments

Trust HXL7® wheel-ends for the long haul

TRAILER APPLICATION		HXL7 WARRANTY	
		LABOR COVERAGE	PARTS COVERAGE
On-Highway ¹	Van, Reefer	7-years	7-years
	Vocational	7-years	7-years

HXL7® is available on most INTRAAX®, VANTRAAX® and TRLAXLE® loose trailer axle models and is approved for applications up to and including 25,000 pounds per axle. Hendrickson warrants HXL7 up to seven-years parts and labor in most on-highway applications.*

* Contact Hendrickson for complete warranty terms, conditions and limitations.

1. HXL7 is not approved for use on Autohaulers or in any off-road application
