

H GENUINE PARTS ULTRA ROD® PLUS™ Two-piece Torque Rods and Replacement Bushings

Hendrickson ULTRA ROD® PLUS™ Two-piece Torque Rods

deliver all the benefits of the ULTRA ROD PLUS with added versatility by featuring empty end hubs. These allow the perfect Hendrickson bushing combination to be added for each application. The two-piece ULTRA ROD PLUS design requires stocking only two part numbers, eliminating large torque rod inventories. This can help reduce part numbers and increase inventory turns.

- The ULTRA ROD PLUS tube and spacer ends are made out of a one-piece forging, eliminating the standard end-hub assembly weld allowing for greater structural integrity.
- The 30" spacer end provides the ability to make any length torque rod desired — just measure, cut, and weld. Refer to Hendrickson Assembly Instructions Literature No. 59310-024, available online at www.hendrickson-intl.com.

Hendrickson Genuine Torque Rod Bushings — Whether the application is a lighter duty on-highway truck or a severe vocational application, Hendrickson offers the right bushings for the job.

XTRB™ BUSHINGS

XTRB™

XTRB Bushings used for severe duty applications, are a combination of chemical bonding and a mechanical design with a hardened steel bar pin, steel casing, and bonded rubber.

BONDED BUSHINGS

BONDED

Bonded Bushings work great in a vocational environment and are easy to install with the funnel tool.

CONVENTIONAL BUSHINGS

CONVENTIONAL

Conventional Bushings press-in easily and provide the durability needed for medium applications.
