The World Rides On Us®

STEERTEK NXT Features and Benefits

Multiple Axle Configurations

- Single or twin steer applications
- Deep or standard drop
- Wide or narrow track
- Flexible spring seat centers
- Multiple steering arm and tie rod arm configurations

Advanced Suspension Integration

- Easily integrates with a variety of suspension configurations
- Available with Hendrickson bushings and springs for additional weight savings and durability

Weight Savings

- STEERTEK NXT's unique design provides up to 40 pounds of weight savings compared to traditional forged I-beam axles

Reduced Maintenance

- Removable kingpin design
- Premium kingpin bushings and seals provide enhanced protection from the elements to improve bushing life

Rigid Axle Beam

- The box-shaped cross section resists horizontal, vertical and twisting forces more effectively than traditional I-beam axles
- Continuous beam architecture minimizes stress points for added durability
- Rated for 100% off-highway use

Compatibility

- Compatible with drum or disc brakes

All applications must comply with applicable Hendrickson specifications and must also be approved by OEM specifications with the vehicle in its original, as-built configuration. Contact Hendrickson or the OEM manufacturer for approval of additional applications.

Call Hendrickson at **630.910.2800** or **855.RIDERED (743.3733)** for additional information.
