WARNING: Check all bolts after installation to ensure correct operation of suspension and avoid premature wear of pivot bushing components.

1. This suspension is intended for on-highway use on trailers requiring a suspension capacity of 23,000 pounds.
2. See L-341 (Intraax installation instructions) and Drawing D-25266 (Intraax common components installations) for information on assembly and alignment.
3. See service manual for information concerning maintenance procedures.
4. Manufactured under one or more of the following U.S. patent nos.: 4,166,640; 5,366,237; 6,213,507. Other patents pending.
5. All dimensions given are nominal and are subject to variation of .06 in. at maximum diameters.
