The COMFORT AIR® rear air suspension is designed and manufactured specifically for the cut away and specialty vehicle market. Available at a 10,000 lbs. capacity rating, COMFORT AIR offers a kneeling feature with minimal forward roll while maintaining stability and driver handling. Air springs and shocks work together to adjust to changing road conditions, providing passengers with a comfortable ride.

- Comfortable ride
- Exceptional handling
- Kneeling feature

COMFORT AIR® Features and Benefits

Air Springs
- Enhance passenger comfort
- Positioned near the axle to transfer more load to the air spring and allow for smoother ride
- Less twist induced on axle from main support spring

Superior Handling Characteristics
Optimized configuration provides improved driver feel for increased handling and confidence when performing maneuvers.

Excellent Ground Clearance

Main Support Members
- Longer front limb length transfers less loads through the frame connection and reduces fatigue
- Designed to reduce roll forward during kneeling operation <1.5” in.
- Designed to achieve 3.5” in. of kneel

Genuine Hendrickson Torque Rods
- Optimized configuration helps improve handling and roll stiffness
- Control lateral forces to maintain axle position
- Enhance handling during cornering

Shocks
- Positioned and tuned for optimum damping characteristics

Structural Components
- Provides over 8.2” in. ground clearance
