NOTES:
1. EXHAUST AIR SPRINGS COMPLETELY.
2. INSTALL PLUMBING PER DRAWING.
3. INFLATE AIR SPRINGS BY ADJUSTING YELLOW KNOB ON REGULATOR UNTIL AIR SPRINGS JUST BEGIN TO INFLATE.
4. ENERGIZE AIR CONTROL SYSTEM TO INFLATE AIR SPRINGS.
5. DE-ENERGIZE SYSTEM (EXHAUST AIR SPRINGS).
   AIR SPRINGS SHOULD DEFLATE AND LOWER COMPLETELY BUT NOT COLLAPSE.

6. IF AIR PRESSURE IS TOO HIGH OR LOW, IN EXHAUST MODE, REPEAT PROCEDURE FROM STEP #3.
7. AFTER DESIRED EXHAUST PRESSURE IS ACCOMPLISHED, LOCK THE REGULATOR BY PUSHING DOWN ON YELLOW KNOB.
8. THE SYSTEM IS NOW INSTALLED AND NO FURTHER ADJUSTMENTS OR MAINTENANCE SHOULD BE REQUIRED.
